

## QLM® KITS Kit Information Tracking System

**IN NEED OF A COST-EFFECTIVE SYSTEM TO TRACK &  
OPTIMIZE YOUR SURGICAL KIT INVENTORY?**

### QLM® Kit Information Tracking System (KITS) Is Your Solution

AdvanTech's *Kit Information Tracking System*, a Quality Logistics Management (QLM) system module, provides OR & CS management with the capability to:

- Manage Surgical Instrumentation by Set Type, Set Mix, Set Consolidation
- Measure / Monitor / Manage Labor Activity & Productivity
- Perform Surgical Instrument Set (*KITS*) Comparative Analyses
- Evaluate Cost of Components in Individual Surgical Sets
- Provide Critical Information for Procedure Cost-to-Revenue Assessment

**QLM KITS** is a user-friendly, Internet-based system that:

- Can be paid for from your operating budget, requiring no capital dollars
- Runs via your standard WEB browser, thus requiring no IT involvement
- Has a Return-On-Investment/Payback of months, not years
- Uses currently available data
- Helps identify critical opportunities for set consolidation & changes
- Is designed for easy use regardless of current computer skills
- Helps you prioritize decisions based on financial impact

**QLM KITS** enhances operating effectiveness for surgical set assembly & sterile processing asset management by providing enhanced management tools for:

Measuring & Managing Labor Productivity,  
Tagging & Tracking Medical/Surgical Devices,  
Improving Availability of Medical Devices, &  
Automating Processing & Handling.

**Enhance Productivity...Reduce Costs...Increase Profitability**
